BIODIVERSITY DUTY

INTRODUCTION - STATUTORY DUTY

Under the 2021 Environment Act, public authorities (including town and parish councils) operating in England must consider what they can do to conserve and enhance biodiversity.

Government guidance published on 17 May 2023 clarifies that, as a public authority, town and parish councils must:

- consider what they can do to conserve and enhance biodiversity.
- agree policies and specific objectives based on their consideration.
- act to deliver their policies and achieve their objectives.

Town and parish councils, unlike other authorities, are not obliged to publish a report on their actions, but the [Government guidance](#) requires all public authorities to complete their first consideration of what action to take for biodiversity by 1 January 2024. They must agree their policies and objectives as soon as possible after this and must reconsider the selected actions within five years of completing their previous consideration, or more frequently if they choose.

To comply with the guidance, town and parish councils could as a minimum:

- have biodiversity as an agenda item for a meeting before the end of 2023.
- note what action they are already taking to conserve and enhance biodiversity.
- agree what further steps they should take to conserve and enhance biodiversity.

Such steps may include:

- reviewing what biodiversity or nature recovery plans are already in place from other local authorities, e.g. potential for jointly-supported wildlife corridors.
- making contact with local voluntary groups working on nature conservation.
- carrying out a biodiversity audit of council landholdings and/or the whole council area, potentially involving residents in a ["BioBlitz"](#)
- gathering expert advice on possible actions in support of biodiversity, such as from [Caring for God's Acre](#) and the [Eco Church initiative](#) in respect of churchyards
- drafting an action plan that covers action that the council will take itself as well as support for the actions of other local bodies.

Whatever action is agreed, as a minimum local councils could ensure they address biodiversity concerns when commenting on planning applications.

LTC BIODIVERSITY POLICY

BACKGROUND

In accordance with the duty imposed on town and parish councils by Section 40 of the Natural Environment and Rural Communities Act 2006, updated by Section 102 of the Environment Act 2021, Loddon Town Council (hereinafter referred to as the Council) which has any functions exercisable in relation to England must from time to time consider what action the authority can properly take, consistently with the proper exercise of its functions, to further the general biodiversity objective.

This duty also means that town and parish councils can spend funds in conserving biodiversity.

DEFINITION

According to Defra (Biodiversity 2020), biodiversity is the variety of all life on Earth. It includes all species of animals and plants – everything that is alive on our planet.

Biodiversity is important for its own sake and has its own intrinsic value. A number of studies have shown this value also goes further. Biodiversity is the building block of our 'ecosystems' that in turn provide us with a wide range of goods and services that support our economic and social wellbeing. These include essentials such as food, fresh water and clean air, but also less obvious services such as protection from natural disasters, regulation of our climate, and purification of our water or pollination of our crops. Biodiversity also provides important cultural services, enriching our lives.

AIMS AND OBJECTIVES

The object of this policy is to work towards conserving and enhancing the biodiversity of the Council's area.

The Full Council and any committees of the Council will consider sustainability, environmental impact and biodiversity when making decisions and will develop and implement policies and strategies as required.

In particular, the Council will aim to improve the biodiversity of the area in the following ways:

- by attending information sessions to ensure that the Council are well informed on the topic
- consider the potential impact on biodiversity represented by planning applications.
- manage its land and property using environmentally friendly practices that will promote biodiversity.
- support local businesses and council operations in the adoption of low impact / nature positive practices.
- encourage and support other organisations within the town to manage their areas of responsibility with biodiversity in mind.
- support residents and local organisation activities to enhance and promote biodiversity.

ACTIONS

Planning applications

The Council will:

- When commenting on planning applications, support site and building design that benefits biodiversity through the protection, conservation and integration of existing habitats or provision of new habitats, e.g swift boxes under the eaves

- Support protection of sensitive habitats from development and will consider whether the development would mean the loss of important habitats for wildlife in respect of all applications, e.g access through fencing for hedgehogs and other wildlife.
- Consider what each proposed development might make in terms of biodiversity net gain.
- Include policies in support of biodiversity within the Neighbourhood Plan.

Land and property management

The Council will:

- Carry out a biodiversity audit of its landholdings.
- Consider all Town Council owned and managed land areas and work towards a balanced maintenance regime. Grass cutting of recreation areas obviously need to be cut on a regular basis but on others grass can be allowed to grow longer between cuts to benefit insects and invertebrates.
- Consider the conservation and promotion of local biodiversity with regard to the management of its open spaces. This will include adopting beneficial practices with regarding to cutting and removal of vegetation, application of chemicals and timing of maintenance work, paying attention to the Government's [regulations for plant protection products](#).
- Take special care in the specification of grounds maintenance contracts to ensure that the work, whilst reaching acceptable standards, does not harm the natural environment.
- Source sustainable materials when procuring supplies for the Council's use
- Consider biodiversity issues and the implementation of changes when managing its buildings.
- To consider including 'wild areas' in Public Open Spaces but ensure access is possible and that pathways and edges are maintained.
- Ensure that the wild areas are clearly signposted to indicate that a deliberate decision has been made to create the wild area.
- Manage existing ponds with a view to increasing the wildlife biodiversity e.g frogs, toads, newts, dragon flies etc.
- Review the cutting schedule for hedges that have berries. If necessary, hedges with berries should be cut on an ad hoc basis or ideally late winter to allow the birds to eat the berries.
- Plant plug plants of various wildflowers suitable for each area to enhance the variety of flora.
- Dedicated wildflower areas should be strimmed and raked once a year.
- Encourage tree planting in and around the Town.
- Discourage the felling of existing and protect mature trees.

Local community

The Council will:

- raise public awareness of biodiversity issues, including through its website, events, social media, signage and newsletters.
- engage with local businesses and residents regarding biodiversity in the community and how members of the community can assist and make a difference.
- where feasible, involve the community in biodiversity projects on its land including for example tree planting, wildflower meadows, birdbox making.

Partners

The Council will work in partnership with other organisations such as B Line and South Yare Wildlife Group to protect, promote and enhance biodiversity within the Council area.

It will review any local nature recovery strategies, species conservation strategies, or protected site strategies in respect of local Sites of Special Scientific Interest (SSSIs) and consider how it may become more involved in implementing the strategies' recommendations.

MONITORING

This policy was adopted by Loddon Town Council at its meeting held on the 14 February 2024 and it will be reviewed in three years or sooner should legalisation dictate.
